Accessories - Cable Management

Description

These panels have been designed for management & organization of cabling inside the Rack Cabinets, and are made of metal to ensure their robustness. A complete range for horizontal and/or vertical patch cable management, or to make changes and identify quickly and easily cables within the cable-bundles, thus avoiding erroneous or accidental disconnection of equipment. Good dressing and distribution of cables, helps to increase the overall air flow inside the Rack, thus preventing overheating of equipment and ensuring optimal thermal performance.
